Check - you're forced to move outwards,
or face a Final Checkmate.

Two forces within me have been pulling me away for years, tearing me apart. The subjugation to the established order juxtaposed with the primal push towards pure work, arts and awe in chaos and insecurity, towards a decentralised resilient anonymous village life.

But now, too l8

The Dystopian 1st world of North America + Europe is in existential serious danger, to the point we have crossed the events horizon. Maybe it was closed long ago, and I just missed it, as my lenses are limited and imperfect.

Here below, I break down a list of the reasons why:

1 - Poisons

Poisons have been there for several decades already, but most of them were tolerable and optional: coca-cola, hard drugs, coke, weed, sugar, ultra-processed foods, hedonism or loneliness, a sedentary lifestyle, long-term physical and spiritual poverty, dependence.

Still worth a trade-off, you could still make it bigly by putting down blood and hours through extreme consistent hard work, maybe?

Plenty of culturally rich and deep experiences await you in the highly polluted post-modern chaotic megalopolis.

Or that used to be the case...

Not anymore, probably, worth the trade-off.

The poisons were tradeable, but there are some poisons much more hideous, yet just about now breathtakingly serious.

1.1 - Preamble: The Covid-19 jab

It killed lots of people. Myocarditis on young men, the dangerous spike protein,

it proved plenty of deception in the msm, and it got into the arms of 9-out-of-10 of us. It probably created massive infertility, some extra million deaths, and a lot of psychological collateral trauma. But it was just the warm-up, for the real killer jabs and fake pandemics are

yet to come.

Development:
We are talking about a virus more transmissible, lethal, and with higher incubation periods in which it still is transmissible. Or a variant of such. Something that with a military martial law declaration is accepted to be forcedly put inside you.

- saRNA

self-amplifying RNA, there's a video on rumble where Robert W. Malone comments its controversial approval for the covid-version in Japan, and its alleged shedding mechanism probably expanding, exacerbating highly as the main new feature, the few shedding previous reports

It was also recently approved for marketing purposes in Europe. Look up "saRNA" on your favourite Twitter "conspiracy" accounts to follow. Or on Rumble.

More info here

the point is that with saRNA it doesn't matter if you don't vax yourself - if you livehttps://rumble.com/v5pqagn-exposed-covid-was-military-operation-it-has-only-just-begun-new-bird-flu-va.html

with other people who will cede to the forced vaccinations agenda, whether passively or actively, this will ensure that you'll also get it. Otherwise, why the hassle to engineer a new version that superproduces the spike protein? The purpose seems to ensure vax-contagion.

they explain it in quite detail here https://www.youtube.com/watch?v=z6DH2MJ0Gbg

1.2 - Edible vaccines

They used to be dark globalist fantasies...: https://archives.infowars.com/edible-vaccines-and-flying-syringes/

Look it up now - it's an impending reality.
Bird-flu hysteria will "vax" all these food sources:
https://x.com/RevelationPepe/status/1871628011579294021

Even more,

1.3 - No vax, no job.

They tried it with covid-19, but the vaccination didn't end up being a must for most jobs, Now that may change - could you afford to lose your job? Most people would struggle. Especially under the impending economic crisis once banks finish

their predicted collapse. Not only by balaji or clif, but by themselves as well probably, controlled demolition from the stock market peak. W. Buffet has more cash than ever, relatively spekaing.

You'll need the UBI as well, once you lose your job. No vax-no UBI.

2- Fluoride

(in the water). If you think that was not an issue, listen again to clif high, where he mentions at some point how fluoride serves the purpose of numbing down your psychic abilities I think (and probably something else), and check out what RFK Jr. said about it- "I'll ban it".

Also Astrazyne, the gay frogs thing, and probably plenty other shit is in the water your drink.

Unscapeable lethal vaxxes even in your food and friends/coworkers, unavoidable toxins that create serious longterm damage in your optional and nonoptional food and water.

3 - Chemtrails + Contamination

Again - the arrival of RFK Jr. shows that this "conspiracy theory" is real. As he has authority, and he is openly against them, just like Trump I think. I don't know a lot about chemtrails, but I do know enough. Targeted "climate change" attacks to

cities may increase, if the were to be real. + Inherent cities contamination with plenty of fumes and plastics everywhere. Btw, no restaurants or eating out, as you lose trust on what is vaxxed and what is not.

Ofc, traditional vaxxes (1970 onwards) with Mercury and other toxins

gave you the autism I (and you) already have, probably, and unfortunately - hence why it is maybe already too late? Checkmate? (Autism indices are so off the charts in relation to 1970 that if you have it is most likely due to the city toxic lifestyle)

In 2, with the fluoride,

you can also just include that affordable food (and even the expensive one!) is genetically modified, filled with chemicals and pesticides some of which are very bad + additives and conservants...
and they give lots of antibiotics to the poultry and cattle, so you must go for

"organic food".

4 - Behavioural:

* Sedentary
* Poorer and more Trapped every year
* Those surrounding you falling into multiple mental illnesses, some of them purely cultural!
* Harder to get out each year you stay in
* Obesity and Degeneracy normalization, conformism

4 is also a poison for you, but to a different extent than literally Air, food or water.

Psychiatric medication and other unnecessary medicines or drugs (extreme e.g. fentanyl, soft example weed or coke) instead of a grassroots movement towards health also damage you within 4.

This is why people like Simon Goddek or Alex Jones just have to get the hell out of cities. Back to the villages, far from the authoritarian govt. dystopic control that will be first delivered to the centralized population techno hotspots where your food, water, electricity and

poo-recollection directly depend on the Government Service - indirectly or directly.

Decentralization, independence, community, self-sufficience, technologically enforced privacy (Starlink+VPN+relays?+solar panels+batteries...), resilience, flexibility, that is what villages

may offer you. It's also harder for the state police to come knock on your door if you live in the midst of nowhere, so to speak.

And now it is more plausible than ever, as more and more people work from home, the cities become more violent and dangerous, and the internet gains

more resilience and leverage.

It used to be the case you could trust the provision of basic services to the central states. But after all that's happened and that which seems about to occur, especially if one were to take cli high's predictions seriously, as well as those of

remote viewers, Baba Vanga's predicition after the fall of Syria, the fact that AGI was recently achieved and the horrible predictions of multiple experts on the dangers of a rogue ASI, the world deglobalization and the current absurd trajectory of the Russia-Ukraine war...

...that is looking quite close to shed into a Europe-Russia war, without US once they pull out of NATO under Trump's government, I mean...

Time is running out...

And besides the negative effects of 1,2,3,4 and the positive effect of 5, in case that an actual Massive Casualty

purging event were to take place... With our without the need of a "WW3" or hot war... (inside jobs like 9/11 or MKUltra have been proven to be real things)...

that's an existential risk you mainly take from being in the cities, and that is mainly represented in the infamous

Deagle Report, see:

You can already see hints of this massive dystopia in UK, in Germany, in US. It will spread massively around Europe, and worsen in those places. The long-term effects of the covid-jab may start manifesting more abruptly soon...https://rumble.com/v2w4s00-massive-military-global-depopulation.html

That would create instability in big cities...

Today may be fine, so may be tomorrow. But do you see yourself, after all that has been considered up, the clear trend and the fatalist situation, staying in your megalopolis for other 10 years? Do you think that's even close to the

sane, healthy decision?

For another 5 years?

I don't even see an extra year at this point. This is the best moment to make the move, if you're still in a big city, like me

The time is now. This was the tipping point. The realization of 1, 2 and 3 were the tipping point for me

Linear extrapolation of the above mentioned trends, from the current fragile situation, at this pace of change, with the current leaders, in the biggest megalopolis...

Only you can seek help, and enlightenment, and health. Be wise. Nobody else cares. It's your life. Be brave.

Bug out. I will soon. If only I had a little bit more money, or knowledge for doing so, I would expediently do it ASAP.

But I was not ready for any of this. I am not naturally a conspiracy theorist. I am a scientist, who was forced to acknowledge the reality as it is, despite it
extremely painful, and after a careful examination couldn't avoid but to stare at the multidimensional facts that are menacing me, promising my demise if I choose to keep staying quiet, standing up paralyzed by fear on the lane.

Oh, + Aliens are coming.

Time for a Change.

Some sauce to see more on the edible vaccine new side-
